MOBILEGuard Ballistic Door Barrier

The Quicker Way to Fortify a Classroom or Office Doorway

When lockdowns are required, the MOBILEGuard Ballistic Door Barrier is there for quick deployment. When stationed near a doorway, it easily rolls into position in less than 20 seconds to provide steadfast protection.

Lockdown Deterrence You Can Count On

- At 85" tall and 43" wide, it completely covers classroom or office doorways
- There is no sightline into the room
- Intruders can't reach over the top
- Starting at 0.6" from the floor, ballistic protection extends up 78"
- Interior 1/4" ballistic core's steel overlaps at all corners
- Designed to meet NIJ III ballistic criteria
- In testing, the door barrier stopped bullets up to 7.62 lead core rifle ammunition
- All corners and edges are wrapped in 14-gauge steel
- Top panel is 14-gauge steel

Easy to Deploy

- Rolls easily on four 5-inch heavy-duty casters
- Handles allow easy maneuvering
- Once in place, casters can be quickly locked for fortification or unlocked for egress
- The unit does not attach to the door or door frame

Use Its Whiteboard Surfaces Every Day

- EVERWhite whiteboard surfaces on front and side panels
- Dry erase surfaces are guaranteed not to stain or ghost
- Easy erasability is a hallmark of the EVERWhite surface
- Surfaces are magnetic, offering expanded presentation use
- MOBILEGuard Ballistic Door Barrier blends in to the classroom environment

The MOBILEGuard Ballistic Door Barrier is a dual-use product that serves as a mobile whiteboard for teaching and presentations and, when temporarily deployed, is intended to deter intruders from entering a classroom or office. When rolled into position and with casters locked, the door barrier adds another layer of fortification beyond a locked door. It is designed to meet NIJ III ballistic criteria. The door barrier covers a standard doorway but in no way attaches to the door, door frame or wall. Check with code authorities to ensure compliance with local or state regulations.
